About Research Money

Delivering crucial insights on government funding and policy for business professionals, academics and policy makers.

Who Are We? We are a Canadian News Organization, with a mission to provide competitive intelligence to Canadian researchers, entrepreneurs, policy makers and funders while celebrating innovation leaders. We connect key players in the innovation ecosystem. Readers benefit from our qualified editorial team's deep policy and funding knowledge, providing insights and unbiased coverage of the innovation economy through in depth reporting. Through our transparent communication, we hold organizations that provide and receive funding accountable while celebrating innovation leaders.

History of R\$ - Research Money was launched in 1987 as one of several technology-focused newsletters published by Ottawa-based Evert Communications. In 2000, The Impact Group began publishing R\$, a fruitful affiliation that included an expansion into national and regional conferences where the who's who of Canadian science, technology, innovation, and policy meet to share information, network and forge new opportunities.

Research Money has established a stellar reputation as the go-to source for the news and insight you need. Decision makers and practitioners have relied on Research Money for 30 years for original and timely analysis of the policies, programs and collaborations designed to transform Canada into a leading player in the knowledge-based global economy.

Many of our readers are at the forefront of shaping Canada's science, technology and innovation landscape, including high-level research managers, policy makers, senior bureaucrats, analysts, investors, entrepreneurs, politicians and researchers from industry, government, academia and the not-for-profit sectors.

What Others Have To Say About R\$

We pride ourselves on the long-term, highly engaged and passionate community of innovators, policymakers, and decision-makers that use R\$.

“Research Money began publishing in 1986. In 1973 I was one of the founders of Linear Technology Inc. which became Gennum Corporation in 1987. I have known Research Money from its beginning and I have copies of all the issues since 1990. Research Money is a unique publication because it has over the years fairly reported on the people, enterprises and players in Canada’s Research world with remarkable objectivity and with no specific loyalty or influence by players in industries, governments, government laboratories, or universities. Research Money has given remarkable perspective on Research, Development, Technology and Education for Canada. Unfortunately the Research parties, interest groups and factions in Canada have had disparate goals that have prevented us from capitalizing on the value presented. The potential is still there and as our resource-based industry faces difficult times and our economy is declining, Research Money can be a major source of wisdom for success in the knowledge-based economy. Our prosperity will depend on this.”

H. Douglas Barber, O.C., Ph.D., D.Sc., F.C.A.E., P.Eng., Distinguished Professor-in-Residence, McMaster University

“I have been a regular reader of RE\$EARCH MONEY for the past twenty years. It’s important for me to keep up with the latest news and trends in science and innovation policy. I rely on information sources that deliver the news that I need to my desktop so I don’t have to spend time searching for articles that may or may not be relevant to my interests. RE\$EARCH MONEY is an invaluable and cost-effective source of reliable information and analysis that keeps me up to date on all the latest developments in Canada’s S&T community.”

David Wolfe, Co-Director, Innovation Policy Lab, Munk School of Global Affairs and Professor, Political Science, University of Toronto
